ZRB 409	第三級海上無線通信士「英会話」試験問題

(注) 解答方法： 選択肢の中から最も適切な答えを一つ選び、その番号に対応する答案用紙のマーク欄を黒く塗りつぶしなさい。

QUESTION 1 At first, she thought the bus tour would be enjoyable, but it quickly became tedious. How did she feel during the tour?

1. She was moved.
2. She was excited.
3. She was bored.
4. She was entertained.

QUESTION 2 Although he hurried to her birthday party, it was all but over when he arrived. How was the party when he arrived?

1. It hadn't begun yet.
2. It was almost finished.
3. It was already finished.
4. It was just beginning.

QUESTION 3 A period of warm or mild weather in late autumn or early winter is called an Indian summer. When I took a walk with my wife in November, she told me, "Today is an Indian summer, isn't it?" What kind of day was it?

1. A warm day in spring
2. A chilly day in November
3. An ordinary autumn day in India
4. A comfortable day that wasn't hot or cold

QUESTION 4 The lengths of Vessel-A and Vessel-B are almost the same. But when their volumes below the waterline are compared, Vessel-A's volume is larger than Vessel-B's. Which vessel is the heavier, Vessel-A or Vessel-B?

1. Vessel-A is heavier than Vessel-B.
2. Vessel-B is heavier than Vessel-A.
3. Vessels A and B have exactly the same weight.
4. It's impossible to tell without knowing the densities.

QUESTION 5 Many countries provide VTS, Vessel Traffic Services, to support safe navigation. In which area of the sea do you usually find VTS?

1. In the middle of the ocean
2. Only in sea areas with dense fogs
3. On coasts where you see very few vessels
4. In narrow channels or seas with heavy marine traffic

QUESTION 6 There are several ways to communicate with people on ships. Which of the following methods suffers from the longest round-trip delays?

1. Communication using line of sight VHF links
2. Communication links using low-orbiting satellites
3. Communication links using geostationary satellites
4. Communication using terrestrial radio propagation links

QUESTION 7 The United Nations Code for Trade and Transport Locations, commonly abbreviated as UN/LOCODE, is used in such cases as when inputting the next port of call on AIS equipment. What do you think is the reason for recommending the wide use of UN/LOCODE?

1. To remove ambiguity or misunderstandings
2. Because the codes assigned by UN/LOCODE are easy to pronounce
3. Because UN/LOCODE is well known to non-professional people
4. For educational purposes for those seafarers who use AIS equipment
